PIET GROOT KORMELINK

Senior Full-Stack Engineer & Technical Lead — Product · Backend · Mobile · AI-Native

piet.groot.kormelink@gmail.com · github.com/pietgk · linkedin.com/in/pietgrootkormelink · Sweden · Remote / Hybrid · CET · Contract or permanent

SUMMARY

Senior full-stack engineer and technical lead who owns solutions end-to-end — architecture through production across React/TypeScript, React Native, and Node/GraphQL (also .NET/C#). 30+ years of end-to-end ownership, from real-time systems and ERP to CTO and VP R&D; last decade in TypeScript/Node startups and scale-ups, including 4+ years leading a live regulated healthcare product. AI-native daily (Claude Code, Cursor, MCP). Sweden-based, valid work permit.

WHERE I FIT

Do not collapse to one title. Match any of these — each has proof:

- **Full-Stack Tech Lead** — Mindler end-to-end ownership and release velocity; NN GraphQL architecture; Finner CTO.
- **Product / Conversion Engineer** — booking conversion 5% → 21%; CSAT 3 → 4.8; Stripe and in-app billing; feature flags.
- **Backend / Principal** — ~20 services and actor model; DLQ incident response; open-banking GraphQL MVP; CQRS-ES.
- **Mobile Product (React Native)** — Mindler RN + Expo CNG / EAS, App Store and Play Store; ParkNow; 0-to-1 RN products.
- **AI-Native Engineer** — vivief/devAC MCP server; Mindler Answers; daily spec-driven Claude Code / Cursor.
- **Scheduling / ops wedge** (not a standalone title) — TechBuddy, Mivon, DiMS! when the domain is planning, logistics, or operational efficiency.

CORE SKILLS

- **Full-stack & mobile:** TypeScript, React, Next.js, React Native, Expo (CNG), EAS, Node.js, GraphQL/Apollo, REST, PostgreSQL, .NET/C#
- **Backend & architecture:** event-driven / CQRS-ES, distributed systems, actor model, AWS (CDK, Lambda, Fargate, SQS, EventBus), Azure, ADRs
- **Product, quality & AI:** conversion / funnels, Stripe & in-app billing, Unleash, TDD, CI/CD, Playwright, Maestro; Claude Code, Cursor, MCP

EXPERIENCE

Mindler — Technical Lead / Senior Full-Stack Engineer · Stockholm · Feb 2022 – May 2026

Live regulated healthtech: React Native + Expo, Next.js, Node/TypeScript + GraphQL, PostgreSQL, AWS — 500+ practitioners.

- Shipped full-stack features end-to-end: designed PostgreSQL schemas, built GraphQL/Node APIs, and shipped React Native + Next.js UIs for iOS and Android.
- Grew first-meeting booking conversion 5% → 21%; React CMS CSAT 3 → 4.8; Stripe and in-app billing.
- Increased app release velocity from monthly to several per week via TypeScript migration, Expo CNG, EAS, and CI/CD automation. App Store and Play Store.
- Established test coverage with React Native Testing Library, Detox, Maestro, and Playwright; enabled rapid releases without regression.
- Backend architecture across ~20 services; actor model; on-call DLQ diagnosis in event-driven AWS. Led quality initiatives: RFC, mentoring, Unleash rollouts. Built Mindler Answers (AST + infra knowledge base).

TechBuddy — Senior Developer · Stockholm · Mar 2021 – Mar 2022

- Designed a partner service-scheduling system from scratch; introduced CQRS-ES; chose TypeScript over Go for hireability.

Klarna — Senior Developer · Stockholm · Oct 2020 – Mar 2021

- Enhanced bank and card features in Klarna's mobile app; improved transaction handling and financial overview for high-volume fintech users.

Nationale-Nederlanden — Technical Architect (Freelance) · Jan 2020 – May 2020

- GraphQL MVP (Node + Apollo + AWS Lambda) into open banking — sold internally, production later; defended architecture in board meetings; RN / Node / AWS per-feature delivery; coached the junior lead.

Finner — CTO · Netherlands · Aug 2018 – Dec 2019

- Owned B2C/B2B stack, Azure DevOps CI/CD, and security end-to-end. Built the team from scratch; strangle rewrite; TDD (React/TypeScript, ASP.NET/C#).

Earlier — architecture, mobile, ERP, R&D leadership

- **Freelance RN:** two 0-to-1 React Native/TypeScript products with GraphQL, OpenID, Storybook, CDK IaC, and GitOps. **ParkNow — lead iOS:** app store in ~3 months. **Nowark:** global RN architecture.
- **Mivon:** ERP 0-to-1 around “everything is a location.” **DiMS! VP R&D:** org ~10 → 110; planning/MIS; technical decision makers across NL, DE, AT, UK, US, AU.

CURRENT PROJECT

vivief / devAC · github.com/pietgk/vivief — federated code-analysis MCP server for AI agents; pairs LLM reasoning with a deterministic core.

EDUCATION

Saxion University of Applied Sciences — Computer Technology (ing.)
